Why Primary Directions?

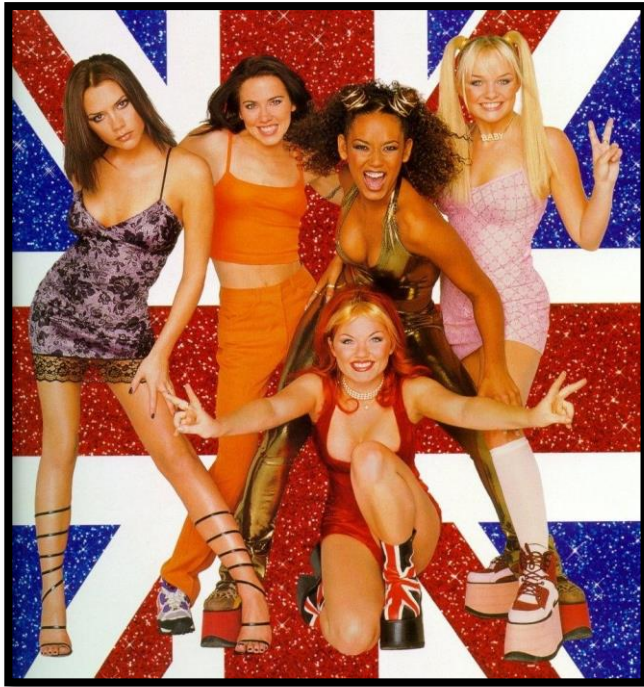

Many astrologers from their specific times were fans of the methods that imply such predictive technique: Ptolemy, Dorotheus, Māshā'allāh, Abu Ma'shar, Regiomontanus and Placidus, Morin de Villefranche and William Lilly. Jean-Baptiste Morin for example, believed primary

directions to be the “...*principal and most divine of all astrology*”. At first, some may think the methods found within a bit confused, but with practice, the professional is capable to predict from the Primum mobile. *But why?*

As the name suggests, it is the primary factor behind it all. Before we consider transits, profections or any other timelords techniques, be sure there is always a first consideration, and that is a direction of promissor planets or points to signifiers planets or points. They offer objective results. However, simple they are not, once there are many technical observations involved, such as the key for finding a date with more precision, and you will witness in this investigation these keys in work.

THE 'GIRL POWER' PHENOMENON

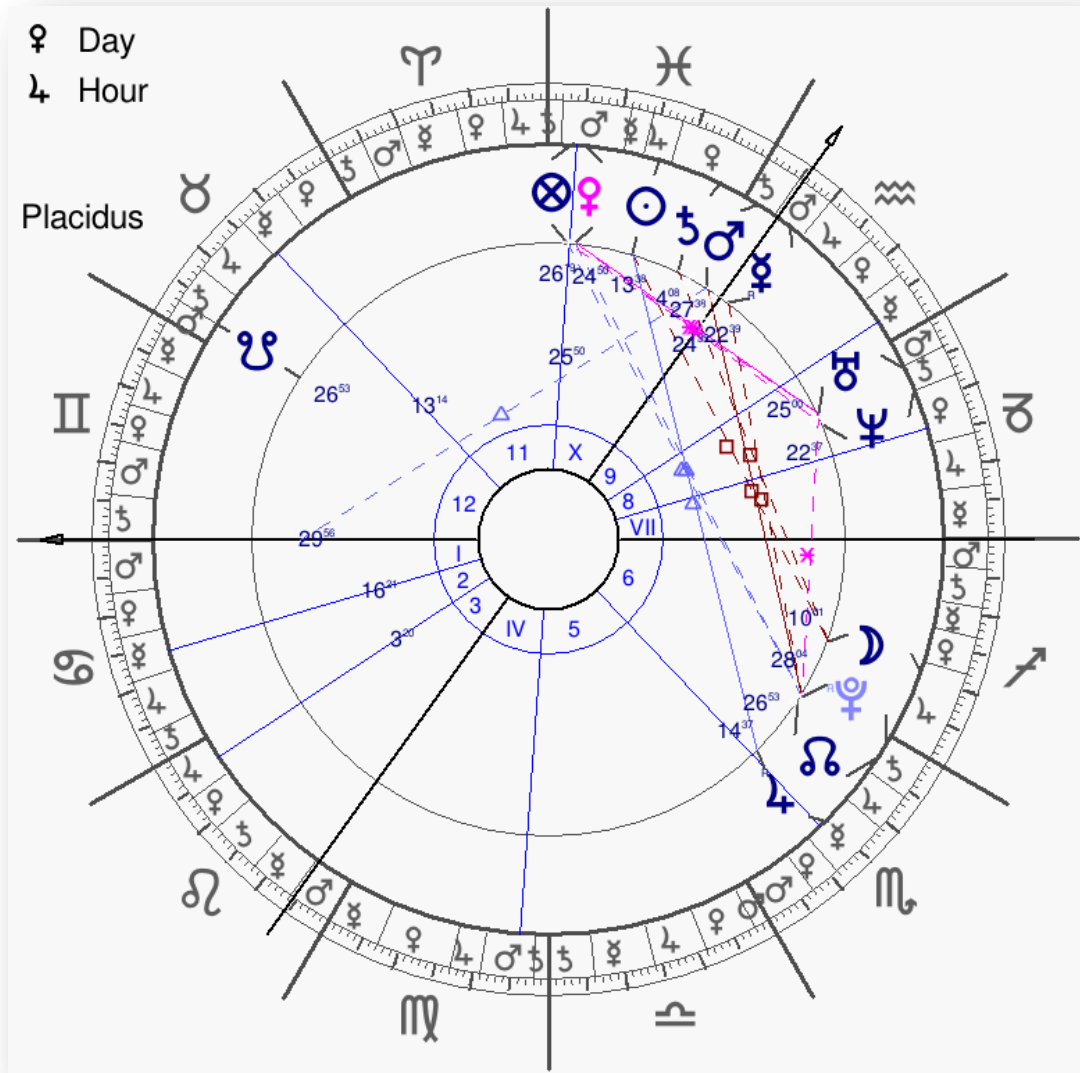

The Spice Girls are an English pop girl group originally formed in 1994. The band is fierce grouped by Melanie Brown ("*Scary Spice*"), Melanie Chisholm ("*Sporty Spice*"), Emma Bunton ("*Baby Spice*"), Geri Halliwell ("*Ginger Spice*"), and Victoria

Beckham ("*Posh Spice*"). The girls were signed to *Virgin Records* and released their famous and successful debut single "*Wannabe*" in 1996, which hit number one in 37 countries while settling them as a global phenomenon. Their debut album *Spice* sold more than 31 million copies worldwide, becoming the best-selling album by a female group in history. Their follow up album *Spiceworld* sold over 20 million copies worldwide. The Spice Girls have sold over 80 million records worldwide, making them the best-selling female group of all time, one of the best-selling pop groups of all time, and the biggest British pop phenomenon since Beatlemania.

CHART OF REFERENCE

SPICE GIRLS FORMATION & "GIRL POWER"

Spice Girls Formation: March 4th; 1994 at 11:00

London, England, 51n30, 0w10 - GMT h0e

*[Chart Rating: A]

*Source: https://www.astro.com/astro-databank/Entertainment: Spice_Girls

THE CHART

Rising & Ruler of the

Chart: Gemini Rising at

Critical or Anaretic

Degrees. The sign of

magazines, gossips, the

one “*who gives names*”.

They didn't come up with

their own nicknames - that

was the idea of former Top

of the *Pops Magazine* editor *Peter Lorraine* back in 1996, it

simple stuck. Their band's image (Ascendant) was prefixed

[rising] by a magazine (Gemini).

When the girls first got together, they were called *Touch*.

Gemini rules hands. Mel B, Victoria, Geri, and Mel C

became members of the *Touch* after responding to a

casting call for a girl group in a magazine in March 1993:

"R.U. 18-23 with the ability to sing/dance. R.U. streetwise, outgoing, ambitious and dedicated?"

It seems the groups were formed at ultimate hour (as if

they were in a hurry), when the rising Gemini was on the

edge of Cancer cusp [at critical 29° Gemini], and in terms

with malefic Saturn, which in turn is square Pluto in the

root [*see results #3 and the band's expiration*].

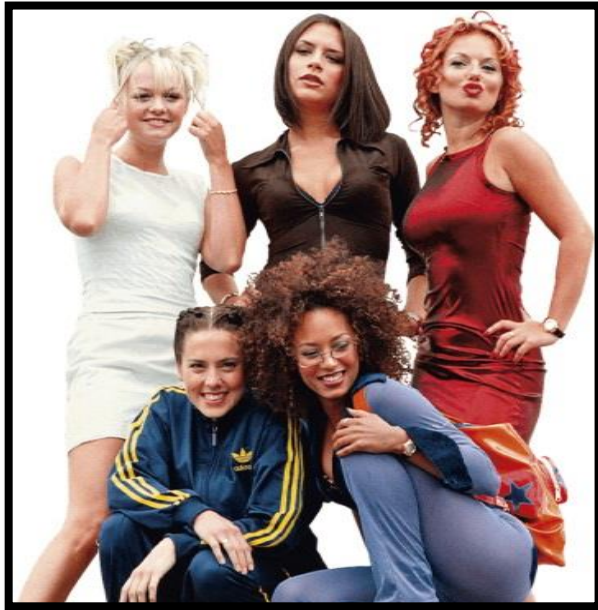

Culminating Sign & Ruler of Mc: Group oriented Aquarius sign is culminating in the chart of the formation, along with Mercury. The Mc [10TH house] is the highest point in the chart representing our world reputation. Mars the competitor culminates besides Mercury the messenger; the group was originally created with a clear message: to "*compete with boy bands.*" The group was initially managed by *Bob and Chris Herbert of Heart Management.* Aquarius rules that what is eccentric, different and unusual, and it also rules airplanes - once the Spice Girls had an airplane named after them named "*Spice One*" back in 2007.

Aquarius is also solo and prefers to be his own boss. At one point the girls decided to run the group themselves; consequently one day, after their performance at the 1997 MTV Europe Music Awards, they decided to fire their then manager Simon Fuller.

Uranus conjunct Neptune in Capricorn trine Pluto: The Spice Girls were formed under the new mundane cycle of Uranus-Neptune conjunction in Capricorn, a feminine [Capricorn] group [Uranus] becoming a global phenomenon/sensation [Neptune]. They were/are not only making you have a blasting time listen to their songs, but the group also signifies a political theme, where a "bunch" of girls would later become a powerful phenomenon, suggesting feminism, freedom of speech, changing the

generations' perspective on future. When I was young and made video tapes with my best friend PeiPei, I was usually Geri, she was my favorite, but I loved them all, the phenomenon reminds me of my whole adolescence. "Disguised" [Neptune] as an art, the group advocates(d) political matters of feminine power, breaking the rules [Uranus] of that what is considered a traditional [Capricorn] feminine role in society. Capricorn is that woman in high heels while Neptune rules feet; the Spice Girls group is 'responsible' for bringing the "*buffalo platform shoes*" to life.

Wannabe – When the two Scorpio risings of the group sang "*Yo, I'll tell you what I want, what I really, really want; So tell me what you want, what you really, really want ...*" the public vibrated. They were right for the role. Mars, the planet that knows what it 'wants', is the classic planet ruler of Geri and Mel B. Anyone from the 90's will with an instant recognize the song [*more on results #3*].

J.D. Considerations: The chart of the formation of the 5 girls screams Girl Power; the group was officially formed when not only the Sun [that what is prominent] was conjunct the last sign of the Zodiac in glamorous Pisces, the most feminine sign of the

Zodiac [the Zodiac initiates with the most masculine sign and archetypical Aries] but Saturn which is also about controlling power and Venus about that what is love and feminist were also in Pisces. The Venus-Saturn conjunction is well known in charts of successful women. Note that Mars [power] is conjunct Saturn but already in Aquarius [group], all in the same house, the 10th house of good fortune, success and influence over others. Wannabe almost wasn't their debut single; the girls have explained they had to fight for the pop classic to be their first single, while the record label reportedly wanted *Love Thing*.

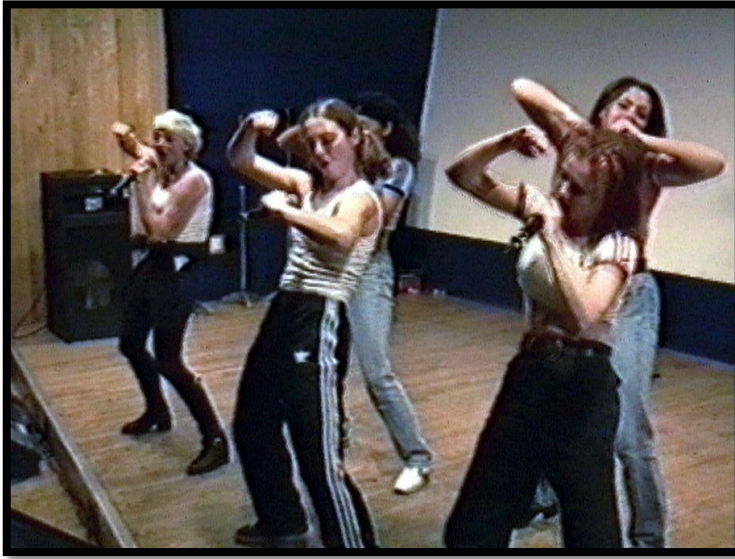

FIXED STARS

constellation]; known for *honor, riches and fortune*. Personal planet in any chart connected with a fixed star, highlights the quality of the planet in spite of that what is prominent behind. Society and pop-culture were up for a ride on the beautiful colorful Pegasus with the Spice Girls commanding it.

Almudebit Venus conjunct Markab: In the chart of the formation of the group, Venus the universal feminine archetype is conjunct fixed star Markab [مركب - the saddle of the horse in the Pegasus

ALMUDEBIT[S]

Victorious of the Chart: Venus and Jupiter are tied in the results of my own calculation pre-configured in *Morinus Software*. Such Almudebit is/are shown in

various charts of events or people with great fan base. They would come back eventually in the future. They had their first reunion after seven years in 2007. Note in **Results #1** the fact all the girls have Venus aspecting (looking at) Jupiter in the root and is westernized in the chart.

DEBUT SINGLE 'WANNABE' IS PUBLISHED

“Wannabe” by Virgin Records: June 26th; 1996

Note: the window between the formation and the single releasing is of **3 Years 3 Months 3 Days and 1 day**

[Placidus] - (Z) Mercury → C → Mc

Result › *Arc of 1.872 = Date of 1996.03.09

Dynamic Key: True Solar Equatorial Arc

Primary Direction: When ruler of the chart and promissor Mercury conjunct significator Mc [own culmination] converse, Wannabe is made public [published]. ***Note that since Mercury is retrograde, it is common for the event to objectively happen later the specific Arc. The Arc is 3 months + 2 weeks & 3 days off [more on results #2 & 3].**

END OF SPICE GIRLS – NOVEMBER 16TH; 2000

2 MALEFICS IN DIRECTION

[Placidus] - (Z) Saturn → D → Mars

Result › ***Arc of 6.218 = Date of 2000.11.21**

*Dynamic Key: True Solar Equatorial Arc
+ Significator with Latitude*

Primary Direction: When end of the game promissor Saturn conjunct significator cutter Mars direct, the Spice Girls attended the *2000 MTV European Music Awards in Stockholm, Sweden* and perform their *#1 hit single 'Holler'*. It's their last public performance as a group until their reunion in 2007.

***From 1994 to their last public appearance in November 16th; 2000, the group officially lasted 6 Years 8 months 1 week and 5 days. The Arc is off for just a few days [5 days]. Saturn is the slowest in motion of all the visible planets, thus it usually delays Arcs [more on results #3].**

SPICE GIRLS REUNITE – JUNE 18TH; 2007

MARS CONJUNCT SUN

[Placidus] - (Z) Mars → D → Sun

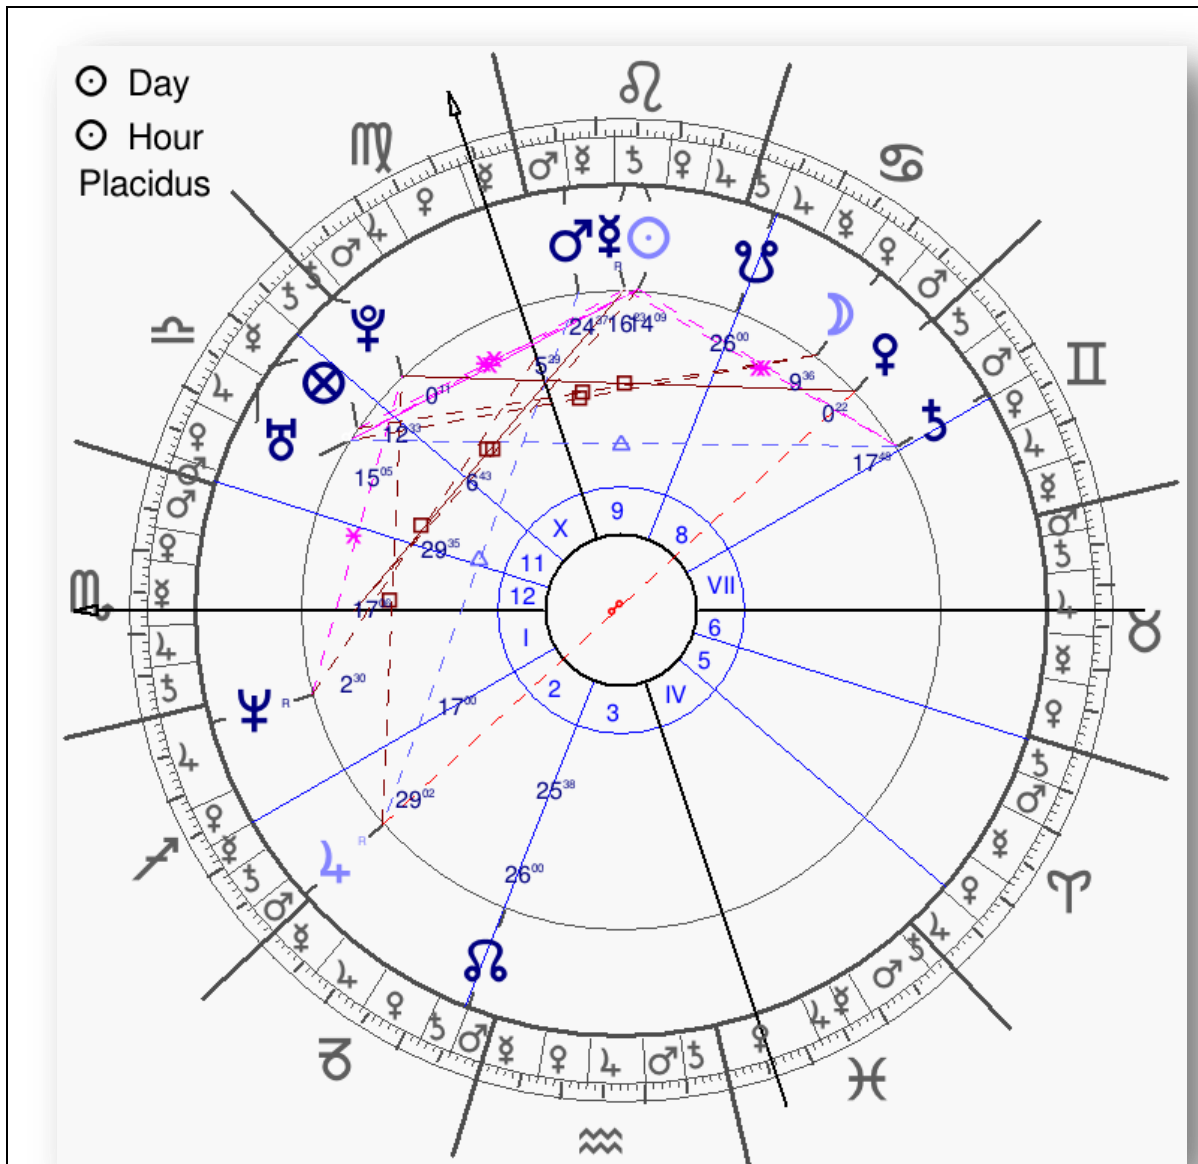

Result › ***Arc of 12.379 = Date of 2007.08.12**

Dynamic Key: True Solar Equatorial Arc

Primary Direction: When the ruler of 11th house of group conjunct ruler of 4th house of fresh new beginnings by primary direction, Spice Girls reunite in London and hold a press conference at London's Arena to announce a World Tour and a Greatest Hits album on **June 28th; 2007**, but they actually began the tour on **December 2nd; 2007**. *[more on results #3]*. ***The Arc is off only about almost a month. In order for Mars to find the Sun by Primary Directions, it had to first pass by Saturn, slowing him down, making an event to objectively happen later than the Arc previously dated as soon as it touched the Sun [more on results #3].**

THE GIRLS
RADIX; MAJOR DIRECTIONS & CHRONOCRATORS

GERI HALLIWELL AS 'GINGER' SPICE

***Born on: August 6th; 1972 at 14:30**

Watford, England, 51n40, 0w25

[chart rating: A]

ALMUDEBIT: SATURN

*Source: <https://www.astro.com/astro-databank/Halliwell, Geri>

J.D. Considerations – She was/is best known as Ginger Spice, the red and lead ingredient let's put it. Not only she is the oldest of the group, but her chart is that of someone everybody would focus on and listen/watch to in the room. Her Scorpio rising made her a power to be reckoned with.

Ascendant Ruler Mars – Ginger planet Mars rules Geri's chart, influencing on her costumes, hair, style, etc. The notorious red-head with the provocative costumes and saucy behavior has a household name. Mars needs space and to act alone most of the time. She left the Spice Girls in 1998 due to depression and differences between the group.

Ruler of the Asc in 9th house conjunct Mercury/Sun – not afraid to show the body; self-dressing [the Union Dress]; wild personality. Geri's iconic *Union Jack dress* was sold for exact 41,300 euros in an auction done by herself; she wore it to perform at the 1997 Brit Awards. Mercury rules cars: The first thing Geri bought with the money she made from the band was getting a second-hand red convertible car.

Ruler of 10th house of Reputation conjunct Mars and Sun – her reputation is that of fiery, outspoken, direct, wild and audacious, no matter how she has *changed* over the years.

THE SPICE GIRLS FORMATION

PROFECTION

21st Profected Year: *Leo – 9th House*

Lord of the Year: *Sun*

In the root, the Sun rejoices in the 9th house and is in terms with Almudebit Saturn.

DISTRIBUTION OF THE ASC

Sagittarius / Jupiter

Jupiter was the Governor period until 2006.

An increase in rank, power, respect and luck. In the root, Jupiter is in terms with Mars, and is trine the Sun-Mercury-Mars conjunction.

PRIMARY DIRECTIONS

Formation [March 4th; 1994]:

[Placidus] - (Z) Lord of the Year Sun → C → Mc

***Result* › *Arc of 20.669 = Date of 1994.03.09**

Dynamic Key: True Solar Equatorial Arc [birthday]

The directions from promissor Sun to significator Mc are one of the most notorious. Time for recognition, success, new direction in life, being part of something huge, stardom, leadership, honor and rank. She was then suddenly known as Ginger Spice. The Sun in the root, not only was in the house of the terminal sign [profected – lord of the year], but the planet is located in there, activated not only by profection then, but by primary direction firstly. ***From Geri's birthday to the formation of Spice Girls, it took twenty years of length, the exact years where the Sun from the 9th house finds the Mc point converse in the radix. While utilizing the right method and key in order to approximate a past event to a certain motion, the Arc appears to be late only 5 days ahead the actual direction.**

Officially Out of the Group [May 31st; 1998]:

[Regiomontanus] - (Z) Moon → D → Almudebit Saturn

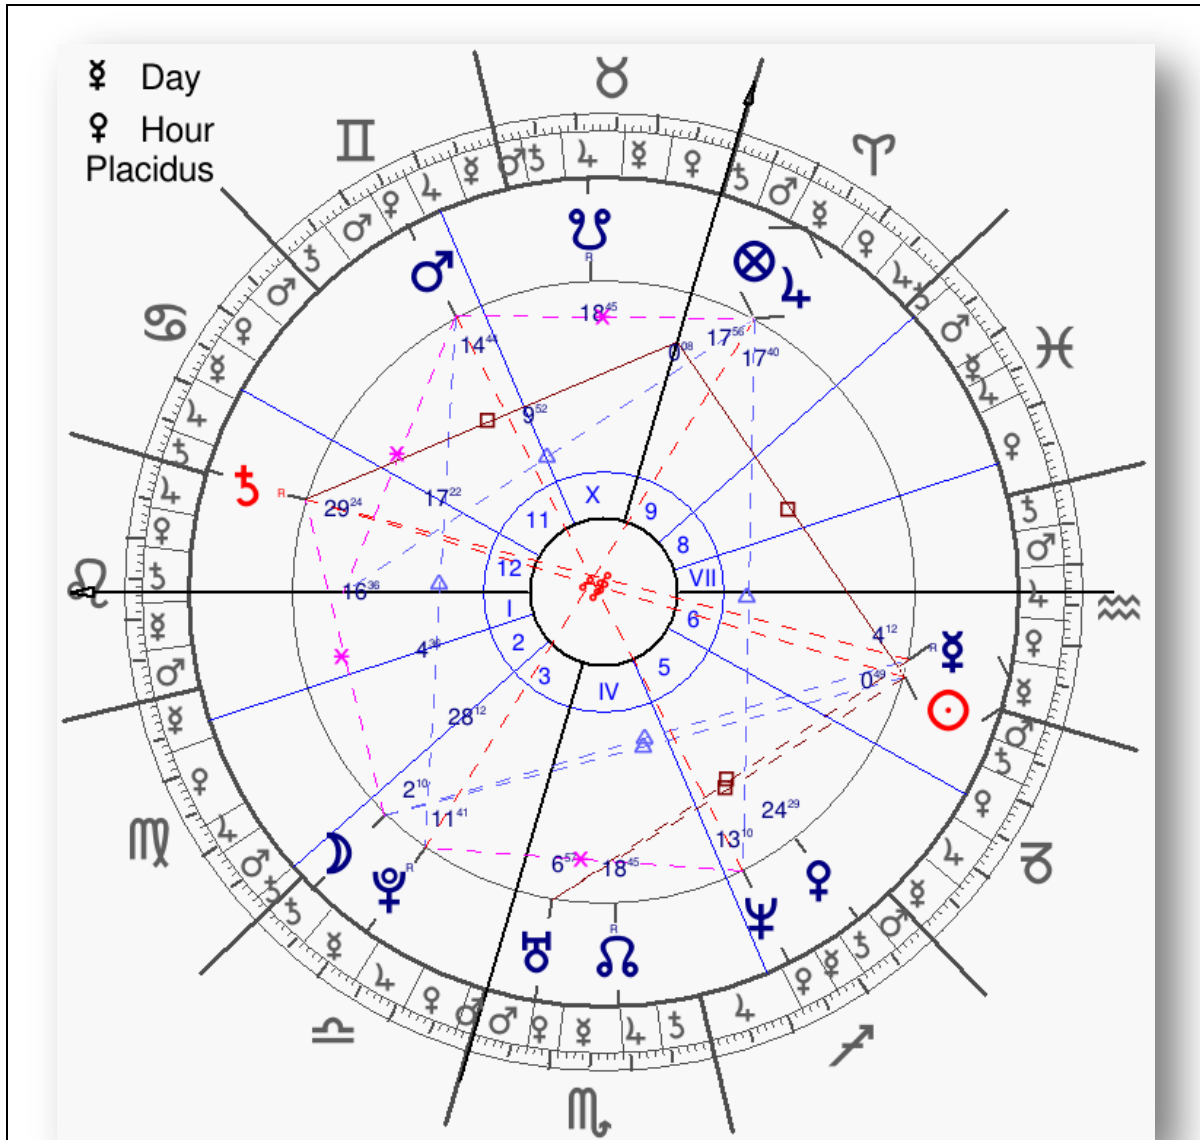

Result › *Arc of 25.921 = Date of 1998.07.09

Dynamic Key: Ptolemy I Significator with Latitude

When in Geri's radix the Moon met limiting and end of things Saturn, Ginger Spice decides to leave the group at the height of the pop group's fame in 1998, leaving the Spice Girls' fans breathless. Saturn is Almudebit of her chart, indicating success even afterwards for her. However, after the natural leader left the group, the Spice

Girls lasted then only for a year without Geri. All of them then decided to experience solo careers. Geri has promissor Moon configured in a T-square [tense] in the root. ***The Arc is only a month and a few days off [Saturn slows down], nevertheless the event is quite objective and such direction is pulsating, the Moon that is quick in motion represented the end of things for Geri, and is taken by primary direction the greater malefic and cutter/killer Saturn.**

EMMA BUNTON AS 'BABY' SPICE

***Born on: January 21st; 1976 at 05:52**

Finchley, England, 51n36, 0w10

[chart rating: C]

ALMUDEBIT: SATURN

*Source: <https://www.astro.com/astro-databank/Bunton, Emma>

J.D. Considerations – Bunton was/is best known as Baby Spice; observe the shinning childish Leo rising. But don't be fooled, that beautiful face hides the skills of a fighter. Sun in the house of Mars trine Moon [Mother]; Emma's mother was a karate instructor, and Baby Spice taught the girls some movements in order to film "*Say'll you be there*" video clip.

Ascendant Ruler Sun – Rooted Sun is restricted with Saturn opposition. However the Sun trine Moon, the '*baby*' planet. The first thing Emma bought with the money she made from the band was a house with a garden for her mother [Moon], because they'd grown up in a flat.

Ruler of the Asc in 6th house conjunct Mercury – She is the '*Virgin*' of the band [6th house]; the one who serves the group; the beautiful lady in that white dress; the flamboyant [Leo rising] personality and also friendly and supportive.

Ruler of 10th house of reputation rejoiced – Ruler of 10th house of career and how the world sees Emma is Venus, people would perceive her achievements as very Venusian, while the planet rejoices in the 5th house in Sagittarius. She does seem as someone you could have plenty of fun with. She is the least to be seen in polemics, if ever. It is known Emma kept all of her Spice Girls dresses, as well as the shoes.

THE SPICE GIRLS FORMATION [March; 1994]

PROFECTION

18th Profected Year: *Aquarius – 7th House*

Lord of the Year: *Almudebit Saturn*

In the root, victorious Saturn rejoices in the 12th house and sextile Moon. And is also Asc+Mc term ruler.

DISTRIBUTION OF THE ASC

Virgo/Mercury

Mercury was the Governor period until 2006.

An increase in contracts, contacts and business. In the root, the planet is conjunct Sun, high status, and trine the Moon, increase in assets, public preferment.

PRIMARY DIRECTIONS

Formation [March 4th; 1994]:

[Placidus] - Mercury Opposition → C → Asc

Result* › **Arc of 1.872 = Date of 1993.08.25

Dynamic Key: Ptolemy

I believe this chart needs an urgent rectification. Leo was surely rising, but the terms would have to be Mercury instead of Saturn, indicating she was born a few minutes after five o'clock. The direction of term-ruler and promissor and also distributor [governor in this chart] Mercury is a good indicator for such rectification. The planet is also conjunct ruler of the chart Sun, recognition, prominent, rank, etc. and is also part of the rooted grand air trine. A few years later promissor Sun would also conjunct the angular significator Dc converse. ***If we adjust [rectify] the chart for for *plus 2 minutes and 25 seconds (17:54:25s instead of 17:52 as the chart above shows), we get the exact date [Arc] of the official formation nevertheless.***

Jupiter [sextile] → D → Mercury = [May 1994]

An aspectual direction that took place simultaneously and worth taking note is that of greater benefic sextile significator and distributor Mercury direct.

Wannabe is Released [June 26th; 1996]

[Placidus] - (Z) Moon [sextile] → C → ASC

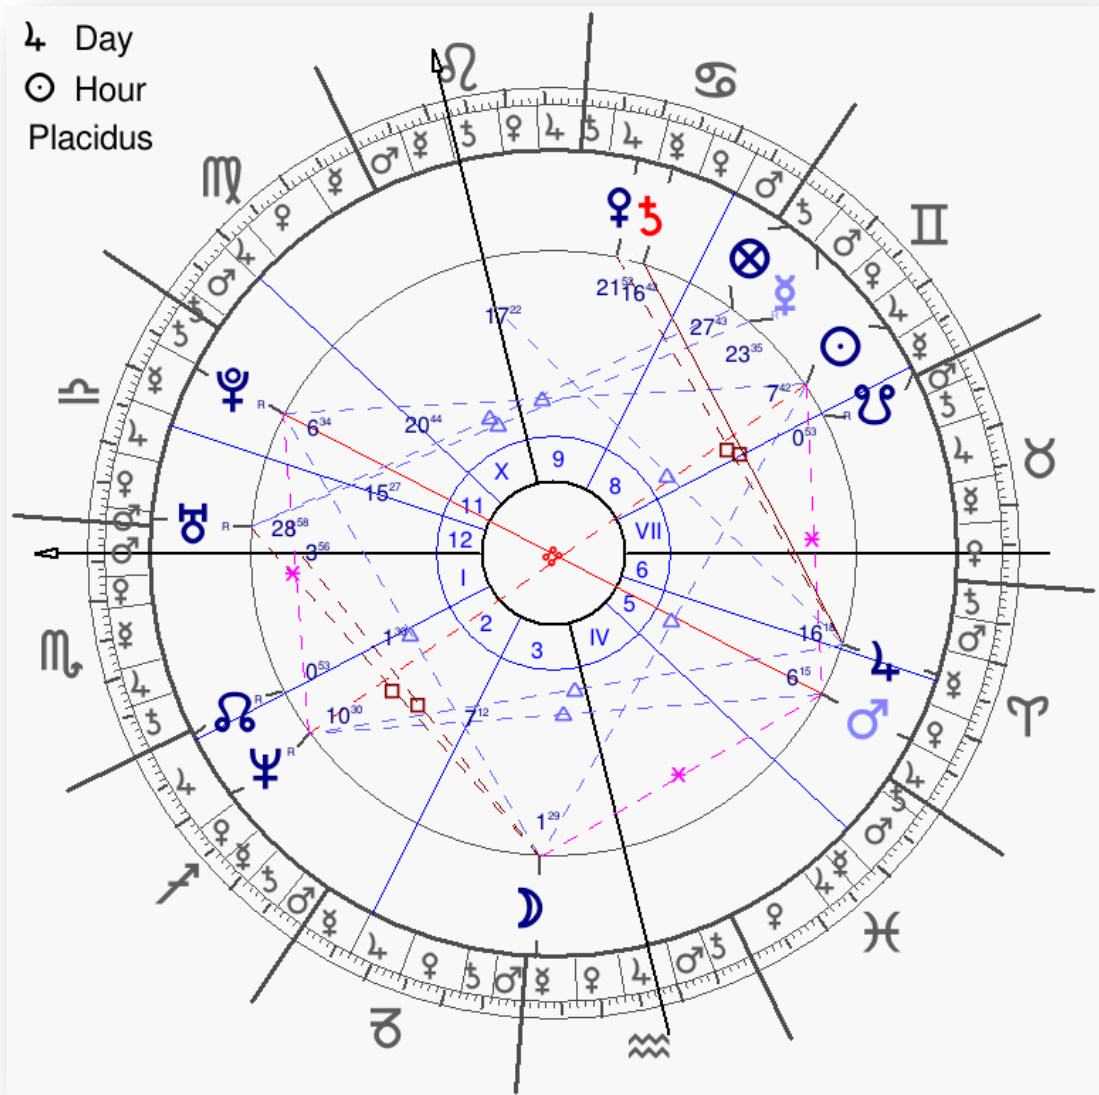

Result › *Arc of 1.872 = Date of 1996.06.29

Dynamic Key: Ptolemy

When the promissor Moon reached significator Asc point by sextile converse, Emma sees herself in the light of the

public, and is quickly known as 'Baby' [Moon] Spice. Note that the Moon is part of the rooted grand air trine. ***The intriguing part of the direction is that if we use the chart above, we get almost the exact date with only 3 days off. But if we rectify to that plus 2 minutes more as just cited above, the Arc goes straight to 1997. *Would a rectification really be necessary? Which event was more important, the formation of the Spice Girls or when wannabe is launched? See more on Results #1 | 2 | 3.***

MEL B AS 'SCARY' SPICE

***Born on: May 29th; 1975 at 17:59**

Leeds, England, 53n50, 1w35

[chart rating: A]

ALMUDEBIT: JUPITER

*Source: https://www.astro.com/astro-databank/Mel_B

J.D. Considerations – Mel B was/is best known as Scary [Scorpio rising] Spice; observe that Scorpio rising in terms with Mars, where in the root, loud and vociferous Mars is opposite spooky Pluto.

Ascendant Ruler Mars in Domicile Aries – Not only Mars is opposite Pluto but it also conjunct optimistic and joyful Jupiter. Yet Mel B can turn out to be quite a bully sometimes. When *Mel C* became a solo artist, fans noticed that some of her lyrics could suggest that she had been bullied while she was in the Spice Girls. A reporter eventually asked *Mel C* about such polemic, specifically pointing the finger at bandmate Mel B, it is said *Mel C* quietly nod in agreement.

Ruler of the Asc in 5th house conjunct Jupiter – Let's suppose she is the second leader of the group followed by Geri. Not that a leader was ever made public, it is my view on the group and the astrological dynamics. Such conjunction signifies a person with incredible natural leadership abilities.

Ruler of 10th house of reputation rejoiced – Ruler of 10th house of career and how the world sees Mel B is the bright and shining Sun in the banning 8th house; the Wannabe video was banned in some parts of Asia due to Mel B's erect nipples. The Sun is also part of the grand trine in air signs [discussed in *Results #1*].

THE SPICE GIRLS FORMATION [March; 1994]

PROFECTION

18th to 19th Profected Year: *Taurus – 7th House*

Lord of the Year: *Venus*

In the root, Venus is in terms with Almudebit Jupiter and aspects the planet as well.

DISTRIBUTION OF THE ASC

Scorpio/Mercury

Mercury was the Governor period until 1997.

An increase in contracts, contacts and business. In the root, the planet conjunct Lot of Fortune.

Scorpio/Almudebit Jupiter

Jupiter was the Distributor period then.

An increase in rank, power, respect and luck. In the root, Jupiter trines Mc, career protection.

PRIMARY DIRECTIONS

Formation [March 4th; 1994]:

[Regiomontanus] - (Z) Sun → C → Mercury

Result › *Arc of 18.807 = Date of 1994.03.19

Dynamic Key: Ptolemy

When promissor and powerful Sun [ruler of 10th house of career, path and stardom] conjunct significator Mercury [and distributor governor], Mel B sees herself in the group of Spice Girls, barely she knew this event would complete chance her life path. Observe that natal Sun is in the 8th house of scaring looking Scorpio, she was afterwards known as the 'Scary' Spice. Note that the rooted Sun is part of the grand air trine. ***The Arc is just 15 days off, her rooted Mercury is retrograde, which could be a reason for the delay of the event to objectively happen in Mel B's life for good.**

Wannabe is Released [June 26th; 1996]

**[Regiomontanus] - (Z) Almudebit Jupiter [trine] → D →
Venus**

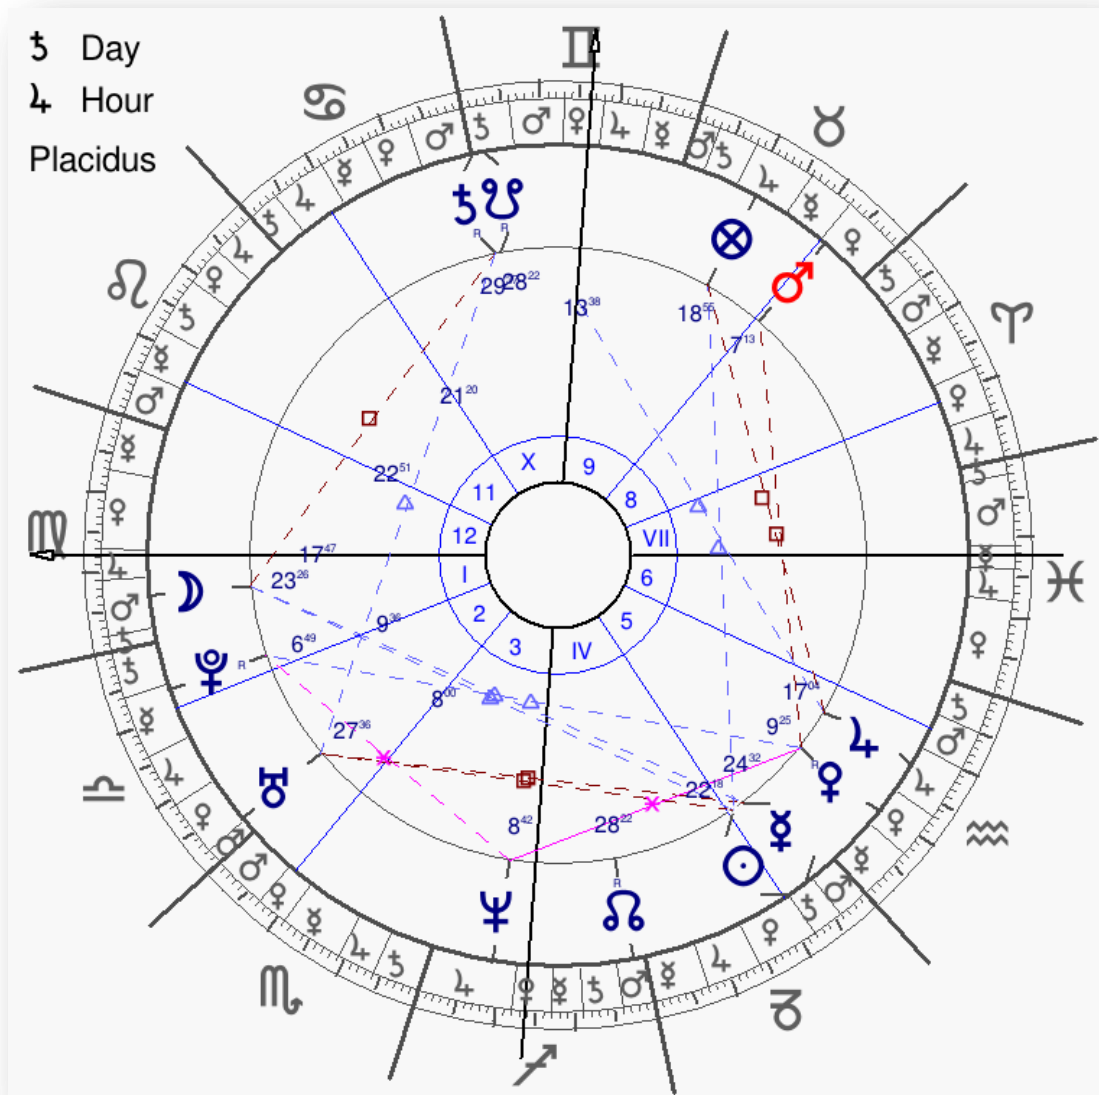

Result › *Arc of 21.116 = Date of 1996.07.10

Dynamic Key: Ptolemy I Significator with Latitude

When a benefic aspect of the two most benefic planets [and the victorious] in astrology sees each other by primary direction, Mel B sees herself at popular rank with the Spice Girls. Rooted lesser benefic Venus is bounded with greater

benefic Jupiter. ***The Arc is just 15 days off [again?]. In order for Jupiter to look good as a trine to Venus, it first needs to pass by Saturn as a trine as well, slowing Jupiter down before it touches Venus, while 'delaying' the event to objectively happen *only 15 days later the Arc* resulted from the radix.**

MEL C AS 'SPORTY' SPICE

***Born on: January 12th; 1974 at 21:32**

Widnes, England, 53n22, 2w44

[chart rating: A]

ALMUDEBIT: MOON

*Source: https://www.astro.com/astro-databank/Melanie_C

J.D. Considerations – Mel C was/is best known as Sporty Spice; with such reserved Virgo rising, she is the “*simple & clean*” of the group, the healthy and athletic representation of the Spice Girls.

Ascendant Ruler Mercury – The Ascendant as seen, influence the native’s personality, thus influencing clothing style, etc. Mel C is usually seemed with practical sense of fabric and raiment, wearing sneakers with fitness clothing style. However, the ruler of the Ascendant is in terms with depressed Saturn; while also suffering from depression being officially diagnosed in 2000 [the same year of the end of the Spice Girls], she used to struggle with over-exercise and restrictive eating (2nd house ruler of food square Mars in *food oriented* Taurus).

Ruler of the Asc in 5th house conjunct Mercury – Mercury rules brothers and cars; one of the first thing Sporty Spice bought with the money profited in the band was a house for her mother and a car for her brother.

Ruler of 10th house – Ruler of 10th house of career and how the world sees Mel C is Mercury, which in turn is conjunct entertaining Sun in the 5th house of stage and artistic endeavors. In my humble opinion and not diminishing the other girls, of all of them I think Mel C is the one with better abilities inside the music industry.

THE SPICE GIRLS FORMATION [March; 1994]

PROFECTION

20^h Profected Year: Taurus – 9th House

Lord of the Year: Venus

In the root, Venus the benefic is conjunct greater benefic and popular Jupiter, while both trine Mc.

DISTRIBUTION OF THE ASC

Scorpio/Mercury

Mercury was the Governor period until 2000.

An increase in contracts, contacts and business. In the root, the planet is conjunct Sun, high status, and trine Almudebit Moon, increase in assets, public preferment.

PRIMARY DIRECTIONS

Formation [March 4th; 1994]:

[Placidus] - (Z) Lord of Year Venus → D → Sun

***Result* › *Arc of 19.972 = Date of 1994.04.11**

Dynamic Key: Cardan

When promissor and lord of the year Venus conjunct significator and notorious Sun [and distributor governor], Mel C sees herself in the group of Spice Girls, barely she knew this event would complete chance her life path. In the root, Sun is located in the 5th house of stages and is also conjunct ruler of 10th house of career and destiny [Mc]. Such direction would begin to mark her entrance into music industry leading to success and prominence. ***The Arc is just a month and 7 days off. However, if we add 7 more minutes to the chart as rectification [which I won't do it], the Arc date would be exact nonetheless. Also, Venus is retrograde in Mel C's radix, slowing down such Arc to objectively happen.**

Wannabe is Released [June 26th ; 1996]

(Z) Sun [trine] → C → Mc = [May 1996]

[Placidus] - (Z) Venus [trine] → D → Almudebit Moon

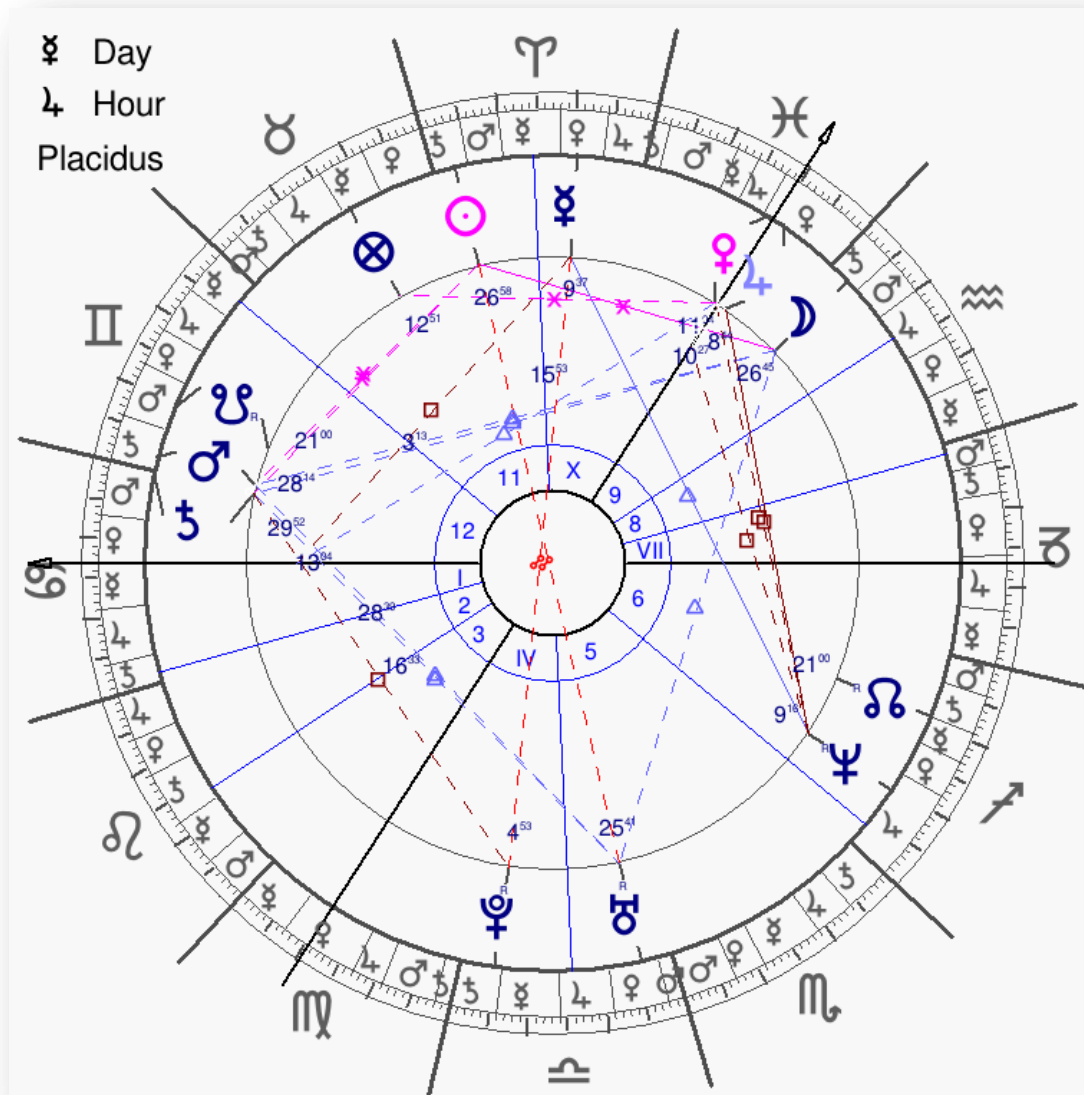

Result › *Arc of 22.405 = Date of 1996.06.09

Dynamic Key: Ptolemy

An aspectual, actual two aspectual directions of benefic planets and aspect [trine] happened also in accordance, yet, that of Venus trine to the Almudebit Moon seemed to be even more precise than that of notorious Sun trine to the Mc, nevertheless, it had its own scenarios and objective

results. In this case, what we were in search has more significations with that Arc of Venus-Moon. After all, the Moon is the victorious planet of Mel C radix. Either way, observe that the Mc is in terms with Venus, while the significator Moon is ruler of 11th house of groups and also television [video-clip *wannabe*]. ***The aspectual Arc is just 17 days off. Again, Venus is retrograde in Mel C's radix, slowing down such Arc to objectively happen.**

VICTORIA BECKHAM AS 'POSH' SPICE

***Born on: April 17th; 1974 at 10:07**

Harlow, England, 51n47, 0e08

[chart rating: DD]

ALMUDEBIT: JUPITER

*Source: <https://www.astro.com/astro-databank/Beckham, Victoria>

J.D. Considerations – Victoria was/is best known as the Posh Spice, the elegant but shy; observe that timid Cancer rising. Her Cancer rising is bounded with Mercury, the planet that rules sisters; one of the first things Victoria bought with the money profited from the band was a house for her sister and her boyfriend.

Ascendant Ruler Moon in terms with rock Saturn – Victoria represents the serious side of the Spice Girls, the one that really means business. In 2004 she developed a line of jeans called *VB Rocks for the Rock & Republic* brand.

Ruler of the Asc in 8th house in Grand Trine and Kite Aspect – Although she is not seen as the strongest vocal of the group in terms of technique, her Sun nevertheless shines whenever she is related to/in groups [this case, Spice Girls obviously].

Ruler of 10th house of reputation – Ruler of 10th house of career and how the world sees Victoria is Almedebit Jupiter, which in turn conjunct partner and marriage lover Venus; her huge wedding cost £628,000 once Victoria is said to be wearing a diamond-encrusted crown, while in an ivory suit. She's is widely known not only for her part in the Spice Girls, but also for the charmed and fortune marriage to the famous and gorgeous football player David Beckham. Her public image is attached to her marriage.

THE SPICE GIRLS FORMATION [March; 1994]

PROFECTION

19th to 20^h Profected Year: *Aquarius – 9th House*

Lord of the Year: *Saturn*

In the root, victorious Saturn rejoices in the 12th house while in terms with itself.

DISTRIBUTION OF THE ASC

Cancer / Saturn

Saturn was the Governor period until 1997.

An increase in career, life direction and success. In the root, the planet is conjunct Mars and trine Moon, mastering the art of being bold and feminine. Note that Saturn is part her rooted grand air trine and Lord of the Year.

Leo / Almudebit Jupiter

An increase in rank, power, respect and luck. In the root, victorious Jupiter is conjunct Venus, power of attraction and notoriety as it also sextile the Sun.

PRIMARY DIRECTIONS

Formation [March 4th; 1994]:

[Placidus] - (Z) Mercury [sextile] → C → Saturn

Result › ***Arc of 19.528 = Date of 1994.02.07**

Dynamic Key: Naibod

I have my concerns for the veracity of the time of this chart provided by the trustful website *astrodatbank* which radix is rated as *DD*, but I will go from there anyway. This is the only chart where a direction of conjunction of planets would not happen under such important event, but an aspectual direction instead. When promissor Mercury, ruler of 4th house of fresh start sextile converse significator Saturn ruler of 7th house of contracts, Victoria is formally introduced as official integrant of the Spice Girls. ***The aspectual Arc is about a month and 3 days off. Saturn is involved in the direction, so it could also be a reason for slowing down such event, happening only after the specific Arc provided by the planets in the radix and the turning of the wheel by primary direction.**

Wannabe is Released [June 26th; 1996]

[Placidus] - (Z) Venus → C → Mercury

Result › ***Arc of 22.405 = Date of 1996.07.08**

Dynamic Key: Ptolemy

When promissor Venus (which conjunct Mc in the root [career, status, rank]) conjunct term-ruler of the chart significator Mercury (which is rooted in 10th house [Mc] and bounded with Venus) converse in 1996, Victoria would soon witness herself in the light of the public/world; Posh Spice is seen as an integrant of a group of huge success in the pop music industry once *wannabe* and the Spice Girls group is debuted and their project known on radios and television. ***The result of provided through the Arc is about 13 days off. Again, this chart is classified by *astrodatbank* as *DD*. Nevertheless, the proximity of the Arc provided thus far found in all girls' chart [including Emma], are intriguing enough to realize astrology as *old school occult science*.**

RESULTS #1

NATAL CHARTS

AGE OF THE MAN: “What Period Was That?”

→ All girls were in the same “Age of the Man” in 1994:

The Girl	Astrological Age	Venus Phase/Face
Geri	♀ [beginning of youth]	Morning - <i>Lucifer</i>
Emma	♀ [beginning of youth]	Morning – <i>Lucifer</i>
Mel B	♀ [beginning of youth]	Evening - <i>Hesperus</i>
Mel C	♀ [beginning of youth]	Evening – <i>Hesperus</i>
Victoria	♀ [beginning of youth]	Evening - <i>Hesperus</i>

How proper (quality) would be each girls’ Venus period? Persian astrologers would view the ages of the man as slices or periods of time. Venus for example period is that of beginning of youth from 14y to 21 years old. Thus, when we look at the girls rooted Venus, we find out that all girls have the planet looking at [in aspect] Jupiter; signifying a great youth, full of opportunities, luck, expansion and early contracts in life. Now, whenever you see each girls natal Venus as governor, distributor, in profecion and transits [SR’s], it will highlight the special quality of their youth in general in those particular years. Such technique is alike that of *Firdaria*, and although as powerful indicator as well, it was not investigated here.

Astrological Venus has two faces/phases, that of morning star anciently known as *Lucifer - the light bearer*, the “phosphorus” girls [Geri & Emma] that are more likely

impulsive but proactive, for example Geri and Emma weren't in the original lineup, as if they were only ready on "*the next morning*", ready to pour down their light into the group; and the face of Venus that of evening star known as *Hesperus* (western), which are the girls more logical and strategic, and when Venus is at its greatest velocity.

Venus is the planet of attraction, what we attract into our lives with *our permission* some way or another, very different from Mars indeed, where things and people are attracted without previous warning. Venusian attraction is usually beneficial, aiding, advantageous, fortunate, favorable, profitable and safe. Lucifer Venus girls attracted more the emotional and devoted fans, as oppose to Mel B, Mel C and Victoria which attracted the fans through a more cerebral effect.

PERSONAL PLANETS CONFIGURATION

→ All girls have Venus in aspect with Jupiter:

The Girl	The Aspect
Geri	♀ ♂ ♃
Emma	♀ △ ♃
Mel B	♀ ♂ ♃ + ♀ □ ♃
Mel C	♀ ♂ ♃
Victoria	♀ ♂ ♃

This is super interesting guys. The 2 most benefic planets interact with each in all the girls' chart. These are the mix planets of popularity & huge success, the lesser benefic Venus and the greater benefic Jupiter, also, the victorious planets or the Almudebit of the Spice Girls Formation chart in 1994. All girls have major aspects between the planets, and Emma is the only who has it as a trine. As pointed out, Emma wasn't in the original line-up. Baby Spice was last to join the group after original member Michelle Stephenson quit the band in 1994. On a different yet same level topic of Venus, Mel B is the only with Venus square Jupiter; followed the years since the Spice Girls end in 2000, no one has had a scariest time than Mel B as seen in her book where she describes all about her dreadful marriage to the producer Stephen Belafonte. Not only would Belafonte (Venus) regularly coerced her [conjunction] into illicit

substance use (Saturn) and dangerous activities, he'd also took advantage [square] of her wealth (Jupiter), Mel C and Victoria on the other side are the ones which you may consider *"lucky in love"*. Victoria for example, at the time Posh Spice met (now celebrated) David, Victoria was already famous as a member of the girl band, and Beckham still had yet to achieve worldwide fame as a footballer for Manchester United. They didn't know who each one was initially.

→ All girls have 'Westernized' Venus:

The Girl	Venus in Sign	House
Geri	♀ in ♋	8 th house
Emma	♀ in ♌	Rejoiced in the 5th
Mel B	♀ in ♋	9 th house
Mel C	♀ in ♎	Rejoiced in the 5th
Victoria	♀ in ♉	10 th house

None of the girls have Venus in the 1st quadrant of the astrological wheel. Well, Victoria has in the East part of the chart but it already culminating and ready to enter the Western part of the chart. This is a declaration of Venusian topics focused more on others than themselves. Geri and Mel B both have Venus in cardinal Cancer, they want people to get high on and interested about their 'embryonic' abilities, their nurturing and mothering side,

their woman power, their children etc. Emma would like people to appreciate her adventurous, wild and fierce part of herself etc. Mel C would love for the people to cheer and value her eccentric behavior, her part in a group, her authenticity and progress etc. Victoria would love people to recognize and adore her for her sense of fashion, glamour, dreamy part of herself, etc.

→ **None of the girls have the Sun in the 1st quadrant [1st, 2nd or 3rd houses]:**

The Girl	The Sun in House
Geri	☉ in 9 th
Emma	☉ in 6 th
Mel B	☉ in 8 th
Mel C	☉ in 6 th
Victoria	☉ in 11 th

Such fact means that none of the girls are too self-absorb/self-centered - perhaps a quality needed in order to join a group and make it work for all. In fact, not only the Sun and Venus are not found in the 1st quadrant of the girls' chart, but neither are personal Mercury and Mars, except the Moon which is rejoiced in the 3rd house of Emma and Mel B, the natural communicators of the group.

→ All girls have Mercury conjunct the Sun, or in the same sign:

The Girl	The Aspect & Sign
Geri	☉♂♀in♍
Emma	☉♂♀in♎
Mel B	☉and♀in♈[wide orbs]
Mel C	☉♂♀in♏
Victoria	☉and♀in♉[wide orbs]

How interesting, none of the girls have their Sun in water signs, the most feminine element; indicating their need to advocate without seeming powerless [needy image] as passive traditional girls. All their Sun signs are masculine except Mel C, in the sign of feminine Capricorn, and still I think she is the less feminine of them all in her own beautiful way, yet she's very casual, something Capricorn can be found of, discreet, down to earth and clear-headed. Realize that all the songs of the group where 'screams' are a must, Mel C is the only of them to really reach such stretched and highest tones.

→ All girls have the Sun configured with group oriented Uranus, except Mel B:

Another configuration that makes the group so unique and original is that the girls have rooted [natal] planet of *groups* Uranus aspecting personal Sun:

The Girl	Aspect/Configuration	Uranus
Geri	☉*	♅ in ♍
Emma	☉□	♅ in ♎
Mel B	☾□	♅ in ♍
Mel C	☉□	♅ in ♍
Victoria	☉♁	♅ in ♍

The fact all the girls have either the Sun or the Moon [Mel B] looking [aspecting] at Uranus, the eccentric and unusual, results in a group that is unique in their *own solo* and peculiar/particular ways [not looking alike each other].

→ All girls have the Sun configured with the Almudebit of the chart:

The most important planet[s] is the *Almudebit* or *Victorious of the chart*, and there are many ways to calculate it, and astrologers usually debate on it. I pre-configured *Morinus* and from there I find the results.

The Girl	The Configuration	Almudebit
Geri	☉ in terms with + ☉*	♃
Emma	Leo Asc in terms with	♃
Mel B	☉ in terms with	♃

Mel C	☉ Δ	☾
Victoria	☉ in the house of	4
Formation	☉ ♂ + ☉ Δ	4+♀

The Sun, that what is notorious and illustrious for all people to see it, in all girls' charts is configured in the root with its Almudebit; their charts are predisposed for public audience and appreciation. They call attention when triumphing. In addition, realize that while Geri and Emma share the same Almudebit [victorious], Mel B and Victoria also share the same. Only Mel C has the Moon as the victorious. Mel C is the one that once felt bullied in the group, the Moon-Saturn square may be here the key to the bullies, once the victorious of the chart gets to be challenged buy such square to the most malefic of the visible planets. Yet her rooted Moon is good, it not only rises, but it trine the ruler of the chart as well as the Sun.

→ Moon in Air Signs

The Girl	Rooted ☾
Emma	Libra ♎
Mel B	Aquarius ♒
Victoria	Aquarius ♒

It is no secret that despite how close they were, there was often a lot of fighting going on. In a 2014 interview Mel B

confesses “we fought like cats and dogs.” However, the air signs were the girls that kept it flowing, brainstorming, and transmitting information to the public and themselves, they keep it cool, without stress or silly fights among themselves, once they can be quite impersonal and detached emotionally. Moon represents our babies and note that Mel B and Victoria have the same Moon in Aquarius; Mel B and Victoria found out they were both pregnant at the same time; Victoria and Emma are godmothers to Geri's daughter.

Worth also noting that all girls have the Moon approximating to the Sun, which is, decreasing in light, or in classical astrological term, the Moon is *occidental* to the Sun. Although none of them have Balsamic or New Moon in their charts, in practical reality, it was as if their ‘souls’ were ready to collect the fire from the Sun and shine through once reaching it by primary directions. No wonder how the Sun was directly or indirectly involved with the directions of the Spice Girls formation in 1994 in all the girls’ radices.

→ Retrograde of the 7 visible Planets:

The Girl	The Planets
Geri	♃ ^R - ♃ ^R
Emma	♃ ^R - ♃ ^R

Mel B	♿ _R
Mel C	♀ _R - ♃ _R
Victoria	none

Realize that Geri, Emma and Mel B, all have Mercury (♿_R) in retrograde motion in their natal charts. Except Victoria [Mel C too but she has Venus retro], she is the one with zero [0] planets retrograde. Victoria was the only one who didn't have her own line in the hit song "Wannabe". Beckham revealed in a 2016 interview, *"They used to turn [my mic] off and just let the others sing. Luckily because I used to wear heels, I just used to jig about a bit and I got away with it, but it never came easily. I was always much more reserved than the other girls."* – said the reserved Cancer rising Spice. Mel C on the other hand, doesn't have a Mercury retrograde like the rest as well, but she is/has indeed the best vocal of the group as far as higher notes are subject of concern. On a post-it, all girls together have a very cool and eccentric mix of vocals that end up resulting into this exotic 'product'.

→ **Aspect Patterns [3 to more planets in a single configuration]:**

The Girl	Pattern	The Configuration
Geri	Mutable T-Square	♀/♃♂♄□♀
Emma	Grand Air Trine	♃/♀△♁△♂/♀

Mel B	Grand Air Trine	☉ Δ ☽ Δ ♀
Mel C	None	-
Victoria	Grand Air Trine + Kite Aspect	☽ Δ ☿ Δ ♂/♃ Same + ☉

All girls share in common the Grand Air trine, except Geri with a mutable T-square, and Mel C the quiet one and more introverted. Air sign people are usually not introverted. Remember that any planet involved in the pattern in any direction, profecion and returns, all the others planets configured in it will also be activated, which are a lot of places in the natal chart as we have seen thus far. Geri is the only of the girls that has Venus [ruler of the age of man] configured in an aspect pattern. Victoria has two patterns, also the grand trine in air signs, and in it there is the Sun at the apex forming the kite aspect. Beckham always wanted to be famous since she was a little girl.

→ Each Girl has a different Asc Term-Ruler, completing all the 5 visible planets/5 bounds:

The Girl	ASC	Bound [term]
Geri	♃	Mercury
Emma	♄	Saturn
Mel B	♂	Mars
Mel C	♃	Jupiter

Victoria		Venus
----------	---	-------

What makes the group look so special and interesting to listen and look at it? The girls have these unique looks and characters which are distinctive from one another, hence the magazine's nicknames which glued like super-bonder. Observe that although Geri and Mel B share the same rising sign [Asc] in bodacious Scorpio, all the girls have different bounds attached to them [remember the Sun and the Moon are not bounds], making each character unique and singular on their own curious way [completing the rest of the 5 visible planets out of 7]. The *audacious minded* Geri, the *child that never dies* Emma, the *fearless confidence* Mel B, the *sober athletic with a purpose* Mel C and finally the *shy & refined coconut water* Victoria.

When we are born, we are born to a certain condition, or, we are bounded with a specific "mission". Geri was born in order to alternate & announce [Mercury]; Emma was born in order to culminate & score [Saturn]; Mel B was born in order to oppose & fight [Mars]; Mel C was born in order to thrive & cheer [Jupiter]; Victoria was born in order to relate & adore [Venus].

→ Level of Mars – Desires, goals, assertiveness, courage and audacity:

The Girl		By
-----------------	---	-----------

Geri	♁	Domineering & Pushing
Emma	♁	Imitation & Lackadaisical
Mel B	♁	Valent & Bold
Mel C	♁	Tenacity & Gradualist
Victoria	♁	Imitation & Lackadaisical

What/How is the Mars' level of each one of the Spice Girls? For example, Geri would accomplish her desires and goals, assertiveness and courage by being domineering and pushing. Emma would do it by imitation and being lackadaisical, the same as Victoria. Mel B by being bold and valent.

While all the girls have Mars in either fire or air, Mel C breaks down the pattern with the planet in the element of earth. She is perhaps the least impulsive of them all, including Emma who can be quite mental when achieving goals [and not emotional oriented]. Mel C is the girl that showed the group that planning and how they invest their times as a group is important and essential to get things done.

SOCIAL PLANETS

→ Jupiter signs and Saturn in Gemini or Cancer:

The Girl	Rooted ♋	Rooted ♊
Geri	Sagittarius	♈
Emma	Aries	♈
Mel B	Aries	♈
Mel C	Aquarius	♈
Victoria	Pisces	♈

We all have different career paths; no matter how 'together' you were with a specific group of people. At the end of it, you are destined to a different path, always. However, some may be alike, and for that, we watch out for Saturn in anyone's chart. While Geri, Mel C and Victoria have a destiny in common, Emma and Mel B have sign in aversion to them, thus, already distinctive from the others. But when we look closer, Emma and Mel B also have different aspirations than the others. Victoria then is the most different from them all, with Jupiter in watery & fashion oriented Pisces.

→ All girls have ambitious Saturn configured with assertive Mars or even itself:

The Girl	Rooted ♋	Configuration to ♂
----------	----------	--------------------

Geri	♄ in 10 th	In terms with ♂ + * ♂
Emma	♄ in 12 th	In terms with ♄
Mel B	♄ in 9 th	□ ♂
Mel C	♄ in 10 th	In terms with ♄
Victoria	♄ in 12 th	In terms with ♄ + ♂ ♂

On *results #2* we have seen about assertive and ambitious Mars/Saturn. Although these two are the classic malefic planets in traditional astrology, you also learn that when these planets are in good place and looking good at Sun, Venus or Jupiter [even Moon sometimes], the Saturnian and Martial matters are soften and enriched with prizes, success, ambition and assertiveness, etc.

In in the Spice Girls case, note that all girls have Saturn in excellent houses, even the 12th house, because it is there where Saturn rejoices [Emma and Victoria], its energy is taken more softly and less rough as they usually express. Observe that even when Mel B has Saturn square Mars, the planet is in the house of the Sun and is conjunct rooted Venus. Now, Geri and Mel C are the ones with also powerful and handful Saturn in the 10th house where it co-signifies, the house of stardom, career, prestige, fame, etc.

THE OUTER PLANETS

→ All girls are from Generation of Pluto in Libra and Neptune in Sagittarius:

The Girl	The Configuration
Geri	♀ in Libra * ♃ in Sagittarius
Emma	♀ in Libra * ♃ in Sagittarius
Mel B	♀ in Libra * ♃ in Sagittarius
Mel C	♀ in Libra * ♃ in Sagittarius
Victoria	♀ in Libra * ♃ in Sagittarius

The girls are all from the same Pluto-Neptune generation sextile in the signs of Libra-Sagittarius, sharing the same collective patterns, the same collective dreams and 'ideals' at astrological level. Power [Pluto] of sophisticated diplomacy and partnerships [Libra] + girls multiplied [Sagittarius] and glamorized [Neptune]. Geri Halliwell is the only of them that has rooted Pluto culminating [angular 10th house]. Wanting to be powerful, famous, and at the mouth of everyone, are basically a pattern found at collective level from such aspect lasting from 1950 to 2032 but in different signs over the years. Neptune in Sagittarius generation has that unconscious need to have plenty of options, having this spiritual awareness of the diversity of the human nature. This is the collective and cultural Arc of inspiration, renovation, revelation and slight progress

without much effort [synchronicities], and also the Arc of the Cinema's golden age. The pop industry of the last century roots can be found in the rock and roll of the 1950s ushered in by Elvis Presley, also known as the "King of Rock and Roll"; then you have Marilyn Monroe, she became one of the most popular sex symbols of the 1950s and early 1960s and was emblematic [Neptune] of the era's changing attitudes towards sexuality [Pluto]. Until 2032 expect the pop culture to have maintain its high influence on society.

→ All girls have Neptune [Ψ] close or near to the Angles:

The Girl	The Configuration
Geri	1 st House [rising]
Emma	Conjunct cusp of 1 st house [rising]
Mel B	2 nd house cusp
Mel C	Conjunct cusp of 4 th house
Victoria	6 th house

Glamour, fashion world, ideals and political visions undercover by art. Neptune near the angles highlights the person's 'aura'. For example, Geri has Neptune rising, of all of the girls, people would project more on her their collective idea of what the Spice Girls group is all about, which is all about positivity, together we are stronger, girl power, women power, feminism disguised as lyrics etc. Emma also has it rising, but already in the 12th house. These

girls were born to complete up and share a fantasy in common, especially Geri, Emma and Mel C.

PLANETARY SECT

→ All girls have the same Planets out of Sect

The Girl	Day or Night – Planet Out of Sect
Geri	Day – Jupiter [<i>oriental</i>]
Emma	Night – Mars [<i>occidental</i>]
Mel B	Day – Jupiter [<i>oriental</i>]
Mel C	Night – Mars [<i>occidental</i>]
Victoria	Day – None
Formation	Day – Jupiter [<i>oriental</i>]
<i>Oriental</i>	<i>rises and sets before the Sun</i>
<i>Occidental</i>	<i>rises and sets after the Sun</i>

All the girls share the same planet out of sect accordingly to their either day or night charts. The girls somehow, share similar problems and life's difficult circumstances alike. Except Victoria that not only has all personal planets above the horizon circle, both planets of the Sun sect are in sect. Jupiter out of Sect [Geri + Mel B] corresponds to people that don't exactly know how to fully enjoy opportunities or deal with abundance and get things out of proportion; they have hard time believing in others and spend energy and even money on silly things, projects and people. Mars out of Sect [Emma + Mel C] is usually a troublemaker, but I don't see these girls as the description. Perhaps, they have hard time aiming and achieving it right on spot. However, it doesn't determine one's success. For example, Victoria,

even when she has Saturn-Jupiter above the horizon circle and lives a wealthy and charming life in many areas, she is the only member of the Spice Girls without a solo number 1.

FIXED STARS

→ Fixed Star Betelgeuse [Orion Constellation]:

“Fixed star Betelgeuse is of the nature of Mars and Mercury. It gives martial honor, preferment and wealth.”

[Vivian E. Robson]

The Girl	The Conjunction
Victoria	♁/♄♁ Betelgeuse
Mel C	♄/♁♁ Betelgeuse

Victoria: Saturn was the lord of the year when the group was formed in 1994. Saturn was also the governor [distributor] of the period.

Mel C: Rooted Sun is in terms with Saturn, and it was the significator of the direction when the group was formed in 1994.

→ Fixed Star Rigel [Orion Constellation]:

“Fixed star Rigel is of the nature of Jupiter and Saturn. It gives benevolence, honor, riches, happiness, glory, renown and inventive or mechanical ability.” [Vivian E. Robson]

The Girl	The Conjunction
Geri	♃♁♁ Rigel

Rooted Saturn conjunct the 8th house of death and resurrection; the planet was involved in the Arc of when Geri decided to leave the Spice Girls in 1998 as significator.

→ **Fixed Star Mirach [Andromeda Constellation]:**

“Fixed Star Mirach is of the nature of Venus. It gives personal beauty, a brilliant mind, a love of home, great devotion, beneficence, forgiveness, love, overcoming by kindness, renown, and good fortune in marriage.” [Vivian E. Robson]

The Girl	The Conjunction
Emma	MC ♂ Mirach

Rooted Mc point is not only ruled by Venus, but its term ruler is also lovely Venus.

→ **Fixed Star Pollux [Gemini Constellation]:**

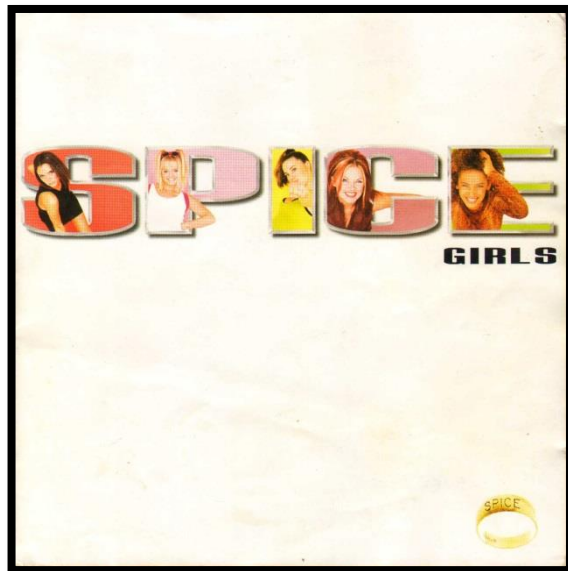

“Fixed star Pollux is of the nature of Mars. It gives a subtle, crafty, spirited, brave, audacious, cruel and rash nature, a love of boxing, dignified malevolence, and is connected with poisons.” [Vivian E. Robson]

The Girl	The Conjunction
Mel B	♀ ♂ Pollux

Rooted Venus is no good at first view. As discussed already at the beginning of these results, Venus not only conjunct limiting Saturn [although there is often a good side of it as well], but such conjunction square out of sect Jupiter; Mel B had the scariest Venusian topics of all the girls.

RESULTS #2

SPICE GIRLS FORMATION 1994

THE OUTER PLANETS

→ **Evolutionary ♀ [Pluto] in the Chart of the Formation 1994** – Although no girl has in their natal charts Pluto connected to the lunar nodes, at evolutionary level, the group was formed when Pluto, the planet of evolution was conjunct North Node of the Moon, where also Almedebit Jupiter of such chart shares the same sign, and although Pluto is cadent, it is in the rejoicing house of lower octave Mars, signifying a great period to create a collective phenomenon, as if they were destined to exist as a group and from there their life would be totally transformed. Pluto was in its domicile Scorpio. The Moon had advanced 10° degrees Sagittarius by that morning, about 12° orbs from Pluto, so it still had that North Node/Pluto 'sense of mission to accomplish' kind of energy.

DISTRIBUTIONS THROUGH THE BOUNDS

→ All girls had Distributions of Mercury, except Geri and Victoria:

All Persians, Babylonians and Egyptians were used to such technique, in which each Zodiac sign is divided by five [the 5 visible planets minus the Sun/Moon] unequal portions named *the bounds* or *terms of the signs*. We can predict major general life condition for years ahead according to such time lords, by 'directing' the Asc through the bounds of the Zodiac signs.

The Girl	Distribution	Transiting Distributor
Geri	Sagittarius/Jupiter	<i>Transiting Jupiter was conjunct rooted Asc</i>
Emma	Virgo/Mercury	<i>Transiting Mercury was conjunct rooted Mercury</i>
Mel B	Scorpio/Mercury	<i>Transiting Mercury was conjunct rooted Moon</i>
Mel C	Scorpio/Mercury	<i>Transiting Mercury was conjunct rooted Venus/Jupiter</i>
Victoria	Cancer/Saturn	<i>Transiting Saturn was conjunct rooted Venus/Jupiter</i>

When active, transiting planets [SR's] will affect such natal distributor of the Asc more than usual, and will simple turn to be a major topic for months/years to come. All girls were having Mercurian types of topics, except Geri and Victoria,

where the first was having Jupiterian themes while the last was being governed by Saturnian matters. One example to follow is that of Geri; two years later [the year of debut 1996], the Ascendant by primary directions reached the body of Neptune, making him a partner and second time lord of the distribution, Geri was soon to accomplish her fantasy [Neptune].

Worth noting that all the distributors of the period of the band's formation was involved at least one planet of the girl's *aspect pattern* [seen in results #1].

PROFECTIONS

→ All girls had either 9th or 7th house Profected Year, also the lord of the year as Venus or Saturn, except Geri:

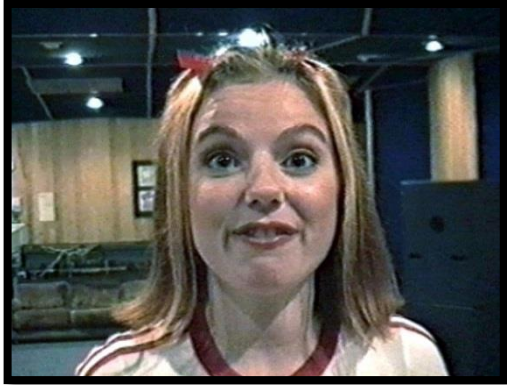

The terminal sign [profected sign] positions us out on a 'journey' for the year ahead from any birthday. The yearly lord is found here instead of Solar Returns' rulers; yet, both can interact and even be the same, of course.

The Girl	Profection Sign/House – Lord of the Year
Geri	Leo/9 th house - ☉
Emma	Aquarius/7 th house - ♃
Mel B	Taurus/7 th house - ♉
Mel C	Taurus/9 th house - ♉
Victoria	Aquarius/9 th house - ♃

At the day of the formation, all the girls were around 18th-19th years old, except Geri, the oldest of the group, which was already on her 21st birthday, and because of intercepted signs, including the profected sign, it would 'travel' for 2 long years in the 21st place of the root [or, the 9th terminal point from the Asc].

Note that natal Mercury [also, ruler] in the chart of the formation is rooted in the 9th house, where its primary direction to the Midheaven [Mc] Converse activated the period of instant success and the group's access into

stardom, all things of the Mc occurred when they debut their first song and clip wannabe in 1996, two years after the group's formation.

When such group of girls that didn't know at the time their lives would change overnight, they were having either Venus [popularity] or Saturn [Mc qualities] as the lord of the year for the period of the formation, except Geri, which was having notorious and leading Sun as the immediate orientation. Geri actually missed the original audition after getting sunburnt on a ski trip to Spain, thinking it would be better than to turn up to the auditions with a red face. Luckily then-manager Robert 'Bob' Herbert decided to give Halliwell a second chance when she called after the original search. The Spice Girls were originally called *Touch*. It wasn't until Geri thought to change their name to Spice that the group eventually agreed on Spice Girls. Geri's motivation that year was that of originality and being noticed by strategy with a notorious band's name.

TRANSITING RULER [MERCURY] TO NATAL CHARTS

→ All girls had Personal Planets in connection to transiting Mercury of 1994, the ruler of the chart of the formation:

The Girl	Transiting Mercury - [aspect] Natal Planet
Geri	♀ → * ☉/♀/♂
Emma	♀ → Δ ☽ + ♂ ♀ + Δ ♂
Mel B	♀ → + ♂ ☽ + Δ ☉/♀
Mel C	♀ → ♂ ♀
Victoria	♀ → ♂ ☽ + * ☉/♀

At the day of the formation, transiting Mercury, as noticed before, was looking [aspect] good to many personal planets of all girls' charts. Trines and sextiles are the most benefic aspects, conjunction then can have its best and worst out of it. In this case scenario, they were ready to represent that chart for their whole lives.

PRIMARY DIRECTIONS

→ All girls had the Sun [notoriety] configured in the Primary Direction in their charts at the Formation's Date:

The Girl	Pre-configured Sun
Geri	Promissor Sun
Emma	Promissor Mercury is conjunct Sun [root]
Mel B	Promissor Sun
Mel C	Significator Sun
Victoria	Promissor Mercury same sign Sun [root]

At the day of the formation, all girls were having 'notorious' directions in their radix; the Sun was heavily involved, if not directly, it was

indirectly, like Emma where the Sun was not directly involved by being neither promissor nor significator, but in the root, promissor Mercury is conjunct popular Sun, the same happened with Victoria. Not to mention all the Primary Directions involved benefic planets.

→ All girls had the Mc [stardom; life-path/destiny] configured in the Primary Direction in their charts at the Formation's Date:

The Girl	Pre-configured Mc
Geri	Significator MC
Emma	Promissor Mercury is square Mc [root]
Mel B	Promissor Sun is 10 th house ruler [root]
Mel C	Mc bounded with Promissor Venus [root]
Victoria	Promissor in 10 th house [root]

Although I did not rectified any of these charts investigated here [neither Emma nor Victoria], it is worth pointing out that the Mc represents great and major turning points in anyone's life where certain events change life for good, and for that reason, the configuration of Mc in any direction is worth studying a further rectification. Not to mention all the Primary Directions of the girls were taking Converse in the Zodiac, except Mel C. I think this was a recurring theme from their past lives, except Mel C which for her this was all new by evolutionary experience point of view. Also, all the planets involved in those directions were benefics.

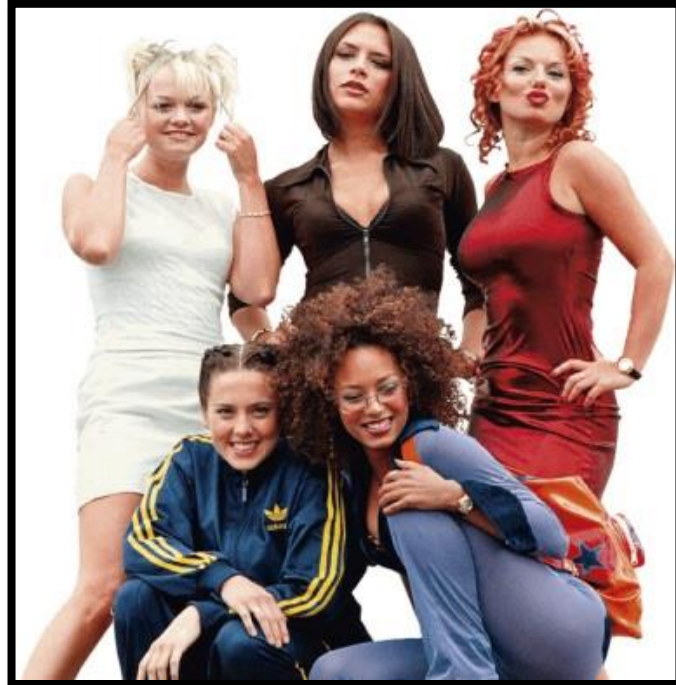

→ All Primary Directions from the *Formation Radix* were results utilizing only the key of *True Solar Equatorial Arc*:

The Objective Event	Dynamic Key
Wannabe is published	<i>True Solar Equatorial Arc</i>

End of Spice Girls 2000	<i>True Solar Equatorial Arc</i>
Spice Girls Reunite 2007	<i>True Solar Equatorial Arc</i>

This result is quite interesting. Astrologers rarely utilize this specific 'key' to predict dates in the charts of people [genethliacal], but as we have learned, such key seems to work out just fine in the charts of events [civil/mundane] and creation of projects etc.; ***see more ahead the different and contrasting results in the charts of the girls.***

RESULTS #3

WANNA BE IS RELEASED

When fast writer Mercury from the radix of the formation 1994 reached its own culmination by primary direction, '*Wannabe*' is released and goes straight in at number three in the UK music charts. A week later the single goes to number one and stays there for seven weeks sharp. The song becomes number one in 31 countries. Rooted Mercury trine by wide orbs its own house ruler, and that happens to be the 1st house. Elevated Mercury is found in charts of people with great selling and marketing skills.

FAST PLANETS CULMINATING

→ **Mars [fast] & Mercury [writing] conjunction** – Mel B once revealed *"We were listening to an old Shaggy reggae song and we were like, 'Oh my God, we have to do something annoying like that song.'"* Mercury the lyric writer is also promissor, the messenger of gods and quick in his feet, in the direction for when *"Wannabe"* is released out to the public [partner significator Mc]. Mars is quicker and does things instantaneously; the song was written in 10-20 minutes while the video was filmed in a single shot. The recording label didn't like the result but the girls enjoyed and didn't want to re-shot, and right on spot and assertive [Mars] they were.

ASPECTUAL DIRECTIONS

→ All girls had sextile or trine [except Victoria] as Aspectual Direction and all had benefic planets configured:

When 'Wannabe' was released, none of the Arcs [except Victoria] of the girls' radixes was that of conjunction of

planets or point[s], as opposed to the results of the Arcs found at the period of the *Spice Girls' formation*:

The Girl	Aspectual Direction
Emma	Moon → * → ASC
Mel B	Jupiter → Δ → Venus
Mel C	Venus → Δ → Moon
Victoria	Venus → ☿ → Mercury

Although there could have been malefic directions and aspectual motions [for example, the recording label not liking the final product while asking to re-do it], I investigated only the directions which results are objectively positive and those that marked their career and

life for good. We could only imagine this would be a great thing, therefore, we shall consider all the benefic configuration in their natal charts and effective/proper techniques. Interesting that all the planets were also benefics Venus or Jupiter or both as was the case of Mel B, and sometimes involving the Sun or the Moon, which are the strongest personal planets and both can be equally great and limited.

GENERAL DIRECTIONS OF BOTH THE *FORMATION* & *WANNABE* DEBUT FROM EACH OF THE SPICE GIRLS NATAL CHARTS: THE DYNAMIC KEYS AND ARC METHODS

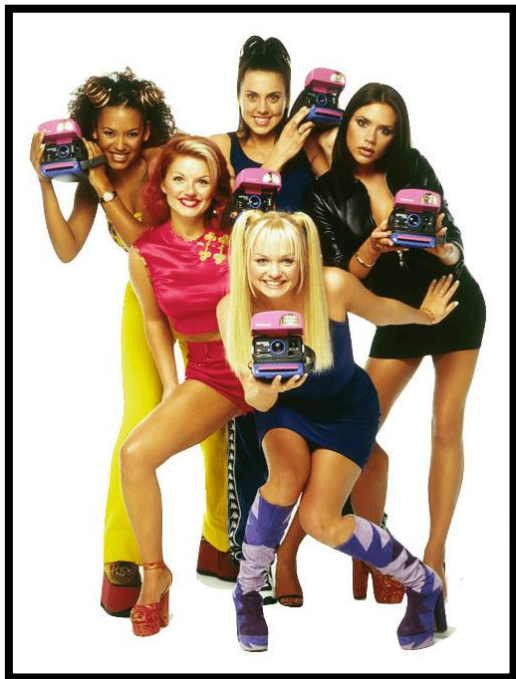

→ The *Key of Ptolemy* [1°00'0" / Coefficient of 1.0] was the most used *static key* in order to find the results of the Arcs provided by the radices more precisely:

The Girl	Formation	Wannabe Released
Geri	Arc: Placidus [semiarc] ----- Key: <i>True Solar Arc Equatorial (birthday)</i>	<i>Not investigated</i>
Emma	Arc: Placidus [semiarc] ----- Key: <i>Ptolemy</i>	Arc: Placidus [semiarc] ----- Key: <i>Ptolemy</i>
Mel B	Arc: Regiomontanus ----- Key: <i>Ptolemy</i>	Arc: Regiomontanus ----- Key: <i>Ptolemy</i>
Mel C	Arc: Placidus [semiarc] ----- Key: <i>Cardan</i>	Arc: Placidus [semiarc] ----- Key: <i>Ptolemy</i>
Victoria	Arc: Placidus [semiarc] ----- Key: <i>Naibod</i>	Arc: Placidus [semiarc] ----- Key: <i>Ptolemy</i>

Very different from all Primary Directions from the *mundane Formation Radix* which results could only be considered under the *key of True Solar Equatorial Arc*. In the chart of all the girls however, take note to the fact that the majority of the Arcs were calculated under the *semiarc method of Placidus*. Both the Placidus semiarc method and

the key of Ptolemy were and usually are the most practiced and preferred method and primary key to astrologers utilizing charts of people.

SPICE GIRLS EARLY EXPIRATION 2000

Note the astrological fact and precise Primary Direction of the expiration date of the Spice Girls is very objective [from the formation's radix]. It involved greater malefic and killer Saturn and significator cutter lesser malefic Mars. When these too met in the root of the Primum mobile, the millionaire phenomenon met its end, and although they make occasional tours nowadays, they'd never come back as powerful as they were [in terms of fame and prestige]. But they did enjoy the time they were given, so were their fans, which until today, whenever they hear "say you'll be there" or "2 become 1" great images of the past are inevitable.

But besides the direction of malefic Saturn, we shall observe a configuration that was promised to shorten the validity of the group to predominately exist for a brief six years of pure success and expansion in many areas on their lives that followed. The chart of the formation has a Sun Sect [planet conjunct limiting Saturn in the root], and thus

one of the Almudebit Jupiter is out of sect [below the horizon circle], cadent and is applying a square [malefic aspect when it reaches the 27°degrees, which is the square or rooted cutter Mars]. Mars on the other hand is culminating [conjunct Mc] in the radix and is in terms with blocking Saturn [short terrific career], and also ruler of the chart Mercury conjunct the planet but already in the 9th house, and the planet is in terms with short lived Mars. Now, if we take the lesser years of cutter Mars of 15 years minus that of Jupiter [12y] and minus that of Venus [8y] you have 5 years of length.

The group lasted 6 years. Venus [in terms with Mars] and Jupiter are the Almudebit of the chart of the formation and Mars of the cutters given the result of 5 years; while the primary direction as seen first in this paper, had shown a more accurate result with only 2 months off the official end in 2000.

However, since the radix indeed has a Hyleg, which is the potent and life-saving Sun, the group until today continues to shine its essence, perhaps not as bright as before [in a global sense and for new generations listen to the new stuff], they turned into a classic and perform eventual world tours. Another thing is that when they reunite in 2007, Mars ruler of the house of groups was conjunct the Sun [in terms with Almudebit Jupiter] by Primary Direction

in that exact year, here in the root, notorious Sun is trine Jupiter, the greatest benefic.

Another way to put it the most simple way as possible, the Moon is pretty bad in such radix, it square killer Saturn. If we take the Moon's $10^{\circ}01'$ degrees minus Saturn $4^{\circ}08'$ degrees, it results in $6^{\circ}13'$ and something. From 1994 to their last public appearance on November 16th 2000, the group officially lasted 6 Years and 8 months.

CONCLUSION

The 1997 epic encounter the group had with South African President Nelson Mandela and Prince Charles of Wales. *“It’s one of the greatest moments in my life.”* – Mandela happily said. Accordingly, Prince Charles said that this meeting with the Girls was actually *“the second greatest moment in my life.”* Self-reflecting afterwards that *“the greatest was the first time that I met them.”* Aren’t they the cutest?

It seems there is some kind of order, a pattern that follows a certain intelligent cosmic arrangement behind the *Spice Girls Phenomenon*. I mean, the girls could have been from different Neptune and Pluto generation, but they are all from the same sextile in the signs of Sagittarius and Libra respectively; or they could have had nothing to do with Venus and Jupiter in their natal charts, but all of them have an aspect between them, which both are indeed the

Almudebit of the chart of the formation 1994 at 11:00 in the morning; or the fact they all have the Mc [stardom] configured in the Primary Direction in their charts at the Formation's date; or the fact all girls had the Sun [notoriety] configured in the Primary Direction in their charts at the Formation's Date; or the fact that all girls had the Sun [recognition] configured in the Primary Direction in their charts at the Formation's date; or the fact that all girls had Personal Planets in connection to transiting Mercury of 1994, the ruler of the chart of the formation; or the fact all girls have Saturn configured with Mars in the root, as well as the Sun with Uranus, the group oriented planet; or the fact that all girls had either 9th or 7th house Profected Year, also the lord of the year as Venus or Saturn, except Geri [having Sun as Lord of the year] which had the idea to change the group's name from *Touch* to *Spice*.

A leading geometrical pattern can be easily detected by astrology, and you just witnessed that by reading this investigation. In the 90's the Spice Girls phenomenon reached millions of people and until today they are globally known, spoken of, listened to and watched. Although the brief huge success in that decade until Geri decided to leave the group, they still make eventual tours from now and then. Victoria also seems to break the pattern some way or another; while all girls have at least one personal planet retrograde including Geri, Victoria does not. The last

Spice Girls tour, Victoria weren't in it and Geri was. People with none personal planets retrograde have no intent to go back to past projects, although some of the times they indeed participate, they do not share the same attitude/enthusiasm as they used.

The group ended up closing the 20th century with a golden key from inside out the pop industry, and in astrology we can see how synchronized that was among each girl's charts and the day of the formation of the Spice Girls and the events preceding to its end in 2000 as well as their further reunions. I could conclude with solar return charts to monthly and daily lords [transits as well], but that will be to a complete book on the Spice Girls Phenomenon & Astrology.

PRE-DEFINITION OF PRIMARY DIRECTIONS CALCULUS & TRIGONOMETRIC FUNCTIONS (ANGULAR)

Declination and right Ascension in Zodiaco
Direction to the Horizon (ASC and DSC)
Direction to the Meridian (MC and IC)
Direction by Proportional Semi-Arcs
Direction by Regiomontanus Circles of Position

RA – right ascension
 δ – declination of planet
 Φ – latitude of birth place
RAM – local sidereal time in degrees (right ascension of MC)
RAIC – opposite RAM (right ascension of IC)
Upper MD – Lower MD
 λ – tropical longitude of planet
 β – latitude of planet
 ϵ – obliquity of ecliptic (present at 23.44°)
ED – equinoctial distance
AD – ascensional difference
OA – oblique ascension (eastern planet)
OD – oblique descension (western planet)
HD – horizontal distance (east or west)
DSA – diurnal semi-arc
NSA – nocturnal semi-arc
FixP – fixed point
MovP – moving point
 φ – under its own pole
